Forecast for Wednesday 27 Nov 2024

Weather: Rain at first on Wednesday, this dying out and clearing east, likely by mid-morning. Rain perhaps falling as sleet on the highest summits. Cloud then tending to thin and break in the early afternoon with winds easing, leaving some sunny spells. Feeling cold. Freezing fog patches are likely to readily form in the valleys during the evening.

Chance of cloud-free hill tops above 600m: 20% improving to 90%.

Low cloud and visibility: Extensive cloud above 400-500m at first but this lifting and thinning with areas of cloud around 500-700m by late morning, with cloud mostly lifting and breaking by mid-afternoon. Visibility will be poor or very poor initially in rain and low cloud, but will gradually improve, with good visibility developing for most in the afternoon. Very poor visibility in freezing fog in valleys during the evening.

Meteorologist's View

Feeling cold out on the mountains but weak winter sunshine in the afternoon will provide some late brightness.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Wed 27 Nov 2024	7.4mm	13mm	72.2mm

Forecast for Thursday 28 Nov 2024

Weather: Freezing fog patches are likely overnight in the valleys, with this being slow to clear during the morning. Otherwise, a bright morning with hazy sunshine, but increasing cloud in the afternoon, perhaps with patchy light rain later. Strengthening southeasterly winds.

Maximum wind: Southerly or Southeasterly 25-30 mph gusts 35-40 mph from mid-afternoon

Chance of cloud-free hill tops 600m: 90% falling to 60% later in the afternoon or evening.

Low cloud and visibility: Freezing fog patches in the valleys will slowly lift and break during the morning. Cloud thickening and lowering during the afternoon with areas of cloud developing above 600m later in the afternoon into the evening. Very good visibility turning moderate during any rain later, and very poor in fog or low cloud.

Temperature: **Valleys:** Minus 1 Celsius rising to Plus 5 Celsius.
At 600m: Plus 2 Celsius rising to Plus 4 Celsius later.
Freezing level: 800m rising above all summits.
